

# ALEXANDER CORONEL

## Senior Software Developer — Full-Stack Systems & AI Integration

Quito, Ecuador | alexcoronel1995@gmail.com | +593 98 269 7669  
linkedin.com/in/acoronel95 | github.com/alexc957 | alexc957.github.io/Alex-reactfolio

### SUMMARY

Senior Software Developer specializing in full-stack systems and AI integration. Builds high-performance applications with Node.js, TypeScript, and React while optimizing database performance and automating workflows. Experienced working on a large Haskell-based platform and hands-on with the AI agentic paradigm (Claude, Copilot). Proven ability to lead data migration projects and enhance business processes with advanced technology solutions.

### SKILLS

**Languages:** JavaScript, TypeScript, Python, Go, Haskell, Java, HTML, CSS

**Frameworks & Libraries:** React, React Native, Node.js, Express.js, NestJS, Angular, Django, Flask

**Databases:** PostgreSQL, MongoDB, MySQL

**AI & Machine Learning:** OpenAI GPT API, PyTorch, Keras, scikit-learn; agentic workflows with Claude & Copilot

**Cloud & Automation:** AWS (S3, RDS/PostgreSQL), Google Cloud Scheduler, Cron Jobs

### EXPERIENCE

#### Software Developer — StackBuilders S.A.

Jul 2022 – Present

Quito, Ecuador

- Engineered a high-performance Node.js CLI migrating 40% of legacy data from Wagtail (CMS) to MDX files, streamlining a “Docs as Code” documentation system.
- Developed a Go CLI tool automating data archiving from AWS PostgreSQL to S3 buckets, improving storage efficiency.
- Led an OpenAI API Proof of Concept integrating LLMs into business processes, improving automation capabilities and informing future implementations.
- Executed advanced query optimization on large-scale databases, significantly reducing latency for backend services.
- Built complex systems with Haskell and Django, leveraging strict typing and functional principles to enhance reliability and maintainability.
- Gained hands-on experience with the AI agentic paradigm using Claude and Copilot to streamline and enhance development workflows.
- Maintained a large-scale CMS built with AEM (Adobe Experience Manager) and Java.

#### Software Developer — Iqbit

Aug 2021 – Jun 2022

Quito, Ecuador

- Built a full-stack debt tracking system on a modern JavaScript stack, achieving high availability and data consistency.
- Developed and maintained a React Native radio application, ensuring real-time streaming stability.
- Automated jobs with Google Cloud Scheduler and Cron Jobs, reducing manual processing by 20%.

#### Junior Web Developer — Mosflor SA

May 2019 – Nov 2019

Quito, Ecuador

- Developed an online store prototype using Angular and Flask, facilitating user testing and feedback.
- Created database documentation and schema modeling, improving transparency and developer onboarding.
- Built responsive web applications with HTML, CSS, and JavaScript.

### EDUCATION

#### Informatics and Computer Systems Engineering — Escuela Politécnica Nacional

Class of 2020

Quito, Ecuador

### LANGUAGES

**English** — Advanced (C1) **Spanish** — Native
